

ANNUAL GENERAL MEETING & TRAINING SESSIONS

AGENDA - APRIL 15, 2026

Annual General Meeting	9:00 - 9:30
Evolving Impact: A 30-Year Perspective on Fire & Life Safety Education A reflective and practical look at how fire and life safety education has evolved over the past 30 years—from awareness-based programming to behaviour-focused, data-driven, and partnership-led approaches. This session explores emerging trends, the expanding role of educators, and the importance of embedding fire safety into all aspects of community life. Presenter: Samantha Hoffman - Deputy Fire Chief of Community Safety, Caledon Fire & Emergency Services	9:35 - 10:35
BIO BREAK	10:35- 10:45
SmartBurner: Patented Technology to Prevent Cooking Fires SmartBurner replaces a standard electric coil stovetop element with patented Thermal Limiting Control technology to help prevent cooking fires before they start. Cooking is the leading cause of household fires and fire-related injuries, and a leading cause of fatalities. Unlike conventional fire safety products that respond after ignition, SmartBurner works proactively at the heat source. It reduces fire risk without interrupting normal cooking or alerting the user. Presenter: Tim Mulroneu - Pioneering Technology Corp.	10:45 - 11:45
Closing Remarks	11:45- 12:00
